On behalf of the Bicycle Indiana Board, we hope this edition of the Bicycle Indiana Resource Guide finds you all doing well and staying healthy as we adjust to new ways of working and socializing. As the Resource Guide continues to evolve in print edition and online, we hope you discover it to be a useful resource for finding all the information you need; whether for recreational rides, mountain biking events or current happenings centered on bicycling in communities across the state. We encourage you to support your local rides, especially the funding rides. These funding rides support Bicycle Indiana and allow us to continue to produce the Resource Guide. Given the restrictions in place because of the Covid-19 Pandemic, we have heard from several ride organizers they are cancelling or postponing their rides. We will do our best to provide that information on the ride calendar on the Bicycle Indiana website, but please also check ride websites for the most up to date information.

The Resource Guide is also a great opportunity to thank all the ride organizers and advertisers. We appreciate your continued support, we look forward to working with you in the future and we hope your events continue to be successful. As always please continue to share ride information, event dates and resources so the Resource Guide can continue to meet the needs of all cyclists.

Indiana continues to grow as a Bicycle Friendly State. Check out the latest report card in the Article Section of the Resource Guide. However, there is still a long way to go with infrastructure and especially safety. Advocacy continues to be a primary focus for Bicycle Indiana. Please continue to reach out to your local legislators to let them know how important bicycle safety legislation is.

Lastly, remember that Bicycle Indiana is a membership organization. We want to hear from our members. We want to hear about the issues that are important to you and we want our members to help shape the direction of Bicycle Indiana and the state of bicycling in Indiana. We know there is strength in numbers and that collaboration among all bicycle organizations, clubs and retailers leads to success. We will continue to work with our state legislators on state laws for bicycle safety. We encourage you to reach out to your local legislators to discuss this issue with them and tell them how important it is to you; invite them on a local ride to show them that we all have a role in sharing the roadway.

If you would like to share your thoughts and ideas, please email me at chair@bicycleindiana.org.

Safe riding,

Allan Henderson, Chair
2020 funding rides

We salute these organizations for their commitment to helping make Indiana a better place for bicycling and we encourage you to participate in these events. These rides contribute $1 for every registered rider to Bicycle Indiana.

*NOTE: Be sure to check organizer websites to see if rides have been postponed or cancelled.

Friday, May 15, 2020
Winona Lake, Indiana
17th Annual Fat & Skinny Tire Fest
KCV Cycling
Fun-filled weekend of all things bicycling in bicycle-friendly Warsaw and Winona Lake. Our “ode” to national bicycle month is an all-size-tires shindig, featuring: kick-off party, community mass ride, road & mountain bike racing, multi-length tours, kids events, BMX stunt shows, expo, live music, great food, and craft beer.

Every two years the League of American Bicyclists ranks all 50 states as to their bike friendliness and publishes the report card.

The criteria for the ranking is the League’s 5 E’s:
Engineering
Education
Encouragement
Enforcement
Evaluation & Planning

Indiana’s most recent ranking of 24 was one of our best rankings in years, but as you can see from the report card, there is a great deal of room for improvement. Although 2019 provided a huge win for bicyclists with the passing of a statewide 3 foot law, Indiana ranks 33 out of 50 in the category of legislation and enforcement. Indiana was ranked 20 out of 50 for encouragement. Indiana received kudos for the Governor’s trail task force and the Next Level Trails Program and we were acknowledged for the safe passing bill.

Whether we agree or disagree with the findings, the report card helps create a map to success. There is no time to rest on our accomplishments and Bicycle Indiana will continue to work with policy makers at all levels of government as we strive to make Indiana a more bicycle friendly state.
Successes & Suggestions

The Bicycle Friendly State report card is based on over 100 data points for each state and input from state agencies and advocates. Based on the information we obtained for Indiana, the League of American Bicyclists believes the following actions will improve the safety, comfort, and accessibility of bicycling in Indiana.

The Interagency Bicycle Trails Task Force has proven that the Governor and executive branch of Indiana has made bicycling and walking a priority for the state’s well-being. Examples of interagency efforts range from the creation of a Statewide Visionary Trails Network to a MOU between INDOT, ISDH, and DNR for workshops and training. This interagency collaboration is a great step for bicycling and walking, and should be an example for other states.

The Next Level Trails program, a partnership between INDOT and the Department of Natural Resources, has recently awarded $24.9M to 17 trail projects and it given applicants technical assistance, including a Trails Cost Calculator tool. Indiana should continue to pursue inter-agency partnerships like this one and build support for bicycling across state agencies.

INDOT has recently embarked on a statewide mobility corridor study in support of its long-range transportation plan. Consider lessons from Washington State’s DOT which has recently created corridor portfolios to better highlight multimodal needs and the ways in which corridors do more than move cars.

Congratulations on adopting INDOT’s Active Transportation Planning effort “Moving Indiana Toward an Active State.” This is an important step in strengthening INDOT’s relationships with local partners and institutional processes related to biking and walking.

Congratulations on adopting a safe passing law, which requires drivers to provide a safe passing distance of at least three feet when overtaking a person bicycling. Make sure that this law is publicized to law enforcement and the public through a coordinated safety messaging campaign.

Indiana is carrying a number of exciting steps to improve conditions for people who bike and walk. To help ensure that these initiatives are given support over time, the legislature and Indiana DOT should create a dedicated funding program within the DOT’s budget to make improvements routine and provide capacity for continued efforts.

The Indiana legislature should pass a Complete Streets law that requires the state DOT and local governments to create safe conditions for all road users.

Commute to work data is one of the rare national datasets on the prevalence of bicycling. While this data captures less than a quarter of bicycle trips, it illustrates the likelihood that bicycling is a viable transportation option. Indiana has a lower than average bike commuting rate and should make it a priority to provide a viable bicycle network system in its communities, particularly where state roads pose a barrier to bicycling.

Adopt a law prohibiting a motorist from opening an automobile’s door unless the motorist is able to do so safely.

Adopt a statewide policy that requires bicycle accommodations on all bridge and tunnel projects. These once in a generation projects should create connections for all transportation users rather than build barriers.

Get the full breakdown of each category and grade average on the next page.

### Bicycle Friendly Actions

</tr>
<tr>
<td>Safety</td>
<td>10.8 fatalities per 10K bike commuters</td>
</tr>
<tr>
<td>Spending</td>
<td>$4.12 per capita FHWA spending on biking and walking</td>
</tr>
</tbody>
</table>

1 This figure is based upon the Census Bureau’s American Community Survey (ACS) 5-year estimate.
2 This figure is based upon fatalities reported over a five-year period according to the National Highway Administration (NHTSA)’s Fatality Analysis Reporting System and the 2015 5-year ACS estimate of the number of bicycle commuters.
3 FHWA spending is based upon projects coded using any of three project types associated with bicycling and walking projects through the Federal Highway Administration (FHWA)’s Fiscal Management Information System. To calculate per capita spending we used a five-year average for fiscal years 2011-2016 and the 2015 5-year ACS state population estimate.
MORE THAN 600 MILES OF biking bliss ARE CLOSER THAN YOU THINK

THE MONON TRAIL, CARMEL AND WESTFIELD JUST NORTH OF INDIANAPOLIS

Plan your two-wheeled getaway at VisitHamiltonCounty.com
The YMCA’s CEO, Marty Pastura, saw the DUET bike and was instantly excited about providing this opportunity in Fort Wayne! The Director of Adaptive Services at that time, Lydia Morris, created what is now “Trail Buddies.” Trail Buddies invites people who have a physical disability or are unable to pedal a bike to go for a ride in the fresh air. This free, inclusive program allows adults and kids to be pedaled by caring, trained volunteers with our specialized bike. The program runs 6 months (May 1 - October 31), weather permitting, out of our Jorgensen Family YMCA. The first season, volunteers gave around 25 rides. The second year’s goal was to double the program and participants more than tripled the number of rides, ending the season with 77 rides! We recently wrapped up our third season, where our goal was to give 100 rides. With many local organizations bringing participants and commitment from our dedicated volunteers, Trail Buddies ended with 142 rides!

I (Rebekah Coffey) oversee the YMCA of Greater Fort Wayne’s adaptive and inclusive programs. Trail Buddies is my favorite program because of the relationships formed. It’s so nice to enjoy the outdoors and get some exercise, all while singing alongside others or chit chatting about life! Trail Buddies provides various social events throughout the season, such as a pizza party, picnic and end of year banquet. One volunteer shared, “I have always loved riding and I really never gave it any thought that there are people that have never experienced a ride. Once I took a few riders, I quickly realized that being able to ride a bike in whatever capacity is still as exciting to the rider as what it has been for me for my entire life. I now champion getting more people on bikes in whatever way I can.”

With the program’s growth, the YMCA of Greater Fort Wayne with the AWS Foundation’s support, has purchased a second DUET bike for the Parkview Family YMCA in 2020. We look forward to many more memories next season! The program provides bike rides for all, but it is so much more than that. As one participant shared, “Smiles and Trail Buddies go together!”

by: Rebekah Coffey
YMCA Trail Buddies Program

YMCA OF GREATER FORT WAYNE

Trail Buddies invites people who have a physical disability or are unable to pedal a bike to go for a ride in the fresh air. This free, inclusive program allows adults and kids to be pedaled by caring, trained volunteers with our specialized bike.

For 45 minutes the rider will be pedaled along trails near the Jorgensen Family YMCA. We have trained volunteers who will provide the rider with a new experience that is both relaxing and rejuvenating.

To get involved, contact Rebekah Coffey, Director of Adaptive Services, at rebekah_coffey@fwymca.org or (260) 755-4961.
Tania Glass
Fort Wayne, IN

What do you love most about riding?
Time with friends acting like a kid

My favorite moment was a destination ride in Chicago. We drove to the train depot, rode the train to Chicago where we rode around all day. Another destination ride on a trail in Marion was just an enjoyable time riding with friends acting like a kid again.

How long have you been riding?
I loved riding as a kid. About 10 years back, I ran into a friend when I was just rolling around downtown and he introduced me to a weekly ride paced 10mph avg 8 miles. I rode the trails about 8 years then got a better bike and a friend talked me into other rides.

Where do you usually ride?
Urban Exploring in Fort Wayne

What type of riding do you usually participate in?
Recreational, Touring, and Mountain Biking

What would you say to a friend to get them to ride a bicycle?
It is fun, relaxing and social. And you can challenge yourself.

---

Rose Scovel
Indianapolis, IN

I have finished four really challenging rides I am proud of. The bike courses for the half Ironman races in Muskoka (Hamilton Ontario Canada) and Traverse City (Michigan) are really challenging with lots of climbing hills. The full Ironman bike at Louisville (Kentucky) was cold and raining when I raced it. And I finally finished the Ride Across Indiana (RAIN) this year.

What do you love most about riding?
The opportunity to challenge myself, to see new places, and to see places differently

How long have you been riding?
Riding was my transportation as a youth, I rode a little on campus and after I graduated from college, but this latest period has been a little over 10 years. I had started getting active when I was diagnosed with T2 diabetes and I wanted to ride for the Tour de Cure. It got me started riding again.

What would you say to a friend to get them to ride a bicycle?
Try it. There are lots of different kinds of bikes any cyclists. Just because I wear a Lycra kit and ride a road bike with aero bars in the street and race triathlon doesn’t mean you have to. You can wear “regular clothes” on a city bike and ride short distances to destinations. We’re all still riders.

WHY WE RIDE!
Laura Craney
Montgomery, IN

It makes me feel ALIVE. It’s one of life’s great freedoms. To feel the warmth of the sun. To “escape”... forget life’s stress for a little while. To challenge myself. Because I CAN! It makes me HAPPY. To get absolutely dirty and worn out. To LAUGH, and sometimes cry. To dream. To breathe, or huff and puff. To feel my own power. To LIVE. It’s a time to be quiet, think, and remember. To RIDE ON through life’s ups and downs and to LOVE.

How long have you been riding?
I hadn’t ridden a bike since I was a teenager, and in 2012 decided to begin riding again as a way to get in shape. That summer I stepped out of my comfort zone and met up with a local cycling group, the Daviess County Slow Spokes. This group felt like family from the start and I have been riding in large groups, with a few friends, and on my own since that moment.

What type of riding do you usually participate in?
Recreational

What is your favorite moment/story from riding?
It seems like each time I ride...there is a new “favorite”. I think being completely exhausted after a difficult or long ride makes me smile the most...like WOW...we did it!

What would you say to a friend to get them to ride a bicycle?
I usually say “come along with me and give it a try!” after they have heard me talk (a lot) about rides or have seen all my posts on facebook

Keith Hutchison
Indianapolis, IN

My favorite moment was leading a Full Moon Ride in the summer of 2018 down an alley stretch in light drizzle, at night. It’s almost impossible to put into words how awesome that 2 mile alley run was. Conditions were perfect and there were no cars out that night in that part of the ride.
While there has been improvement in the total number of traffic fatalities, the 2018 estimates for traffic deaths for people biking and walking unfortunately have continued to increase. Cyclists experienced the largest increase in fatalities of all road users, with an estimated 10% increase in fatalities in 2018. This would make 2018 the deadliest year for people biking since 1988.

At Tabor Law Firm and Bicycle Indiana we believe everyone should feel safe on Indiana roadways. Especially people who bike. The United States stands out among other developed countries for its poor traffic safety record and its inability to take actions to make roadways safer. During the same period when pedestrian fatalities in the US increased by roughly 30%, they were decreasing by 36% in the European Union. Between 2000 and 2013, the US had the smallest reduction in traffic fatalities of 10 high-income countries reviewed by the CDC – and US traffic fatalities have increased by roughly 10% since 2013.

To address the safety of people biking, the United States needs to get serious about addressing traffic safety – and that begins by prioritizing the safety of the most vulnerable people. By focusing on the safety of the most vulnerable – people who walk, people who bike, people who use wheelchairs, people who are older – the overall transportation system will be safer for all of us.

Getting serious about traffic safety is a paradigm shift. It has been about 75 years since fewer than 30,000 people have died on our nation’s roadways in a given year. We need bold action and leadership to change the patterns of planning, designing, building, and behaving that have led to this situation. At the core of the American problem with traffic deaths is prioritizing speed, traffic flow, and convenience for people using single occupancy vehicles. We need to value the experiences of everyone, starting with the most vulnerable, to make a lasting change and become America’s leading role in traffic safety.

Some things that can make our roads safer for vulnerable users include reminding motorists that they have an obligation to share the roadway with bicyclists, pedestrians, and scooter operators. Motorists need to be reminded to be more vigilant. A bicyclist is harder to see under the vision of a motorist.

Those who lease, sell, or make bicycles need to make sure their equipment has the proper reflection to be recognized by motor vehicles at night.

Campaigns by public safety officers can help educate bicyclists, motorists, and scooter riders of the benefits of wearing helmets, to protect them from the risk of unnecessary injuries. Public officials can do more to designate bike lanes for bicyclists by painting the pavement green or a contrasting color to the travel lanes, as well as post advisory warning signs to remind motorists of the potential presence of bicyclists and pedestrians.

This list is by no means exclusive. The bottom line is that it requires a complete effort to keep everyone safe. Bicycle Indiana and Tabor Law Firm are committed to making sure every cyclist feels safe on the roads.
Everything we do at Bicycle Indiana is centered around our belief that riding a bike should be safe for everyone. We’re able to achieve this through education, influencing change, and promoting, building, and supporting partnerships in our community. We are Indiana’s premiere bicycle advocacy organization.

We have three pillars that drive our work and mission, Promote, Educate and Advocate. Below are the programs that Bicycle Indiana offer as we strive to make Indiana a better place to ride and live.

BikeSmart literature
Bicycle Indiana offers a variety of educational booklets and pamphlets with content for both children and adults free of charge. Visit our website and click the bikesmart link under the Get Resources Section

Bicycle Friendly Community seminars and consulting
Bicycle Indiana believes that a better place to bike is a better place to live! We support the League of American Bicyclists Bicycle Friendly America program and offer seminars and consulting to communities, business, and universities in effort to improve their bicycle friendly score.

Ghost Bike Program
Bicycle Indiana believes that all traffic related collisions and fatalities between people who ride bikes and people who drive cars are preventable. Until that time, we honor fallen cyclists with ghost bikes. You can request a ghost bike from our website, under the Get Resources section.

Legislative
The staff and board of Bicycle Indiana works to improve Indiana’s laws and infrastructure at all levels of government, from local to federal. If you have a need in your community, please give us a call.

Bicycle Education
Bicycle Indiana works with League (League of American Bicyclists) Certified Instructors (LCI’s) to offer programs and classes that teach bicycle skills and build confidence to ride for both children and adults. You can learn more about this at our website under the Get Riding section.

Bicycle Indiana Resource Guide
The book you have in your hand is one of our most popular programs. The Bicycle Indiana Resource Guide is published annually. It serves many purposes, but the main purpose is to support and promote the many rides that take place throughout Indiana all year. There is no charge to list your organization’s ride and you can increase exposure of your ride with a funding ride. For more information, click on the Resource Guide on our homepage.

Is there a program you’d like to have but don’t see it listed? Give us a call at 317-466-9701 or email at info@bicycleindiana.org and let’s have a conversation!

Display your pedal passion and help make Indiana more bicycle friendly. Go to https://www.in.gov/bmv/2620.htm to get your Bicycle Indiana license plate.
Sec. 9 A bicycle operated on a highway from one-half (1/2) hour after sunset until one-half (1/2) hour before sunrise must be equipped with the following:

1. A lamp on the front exhibiting a white light visible from a distance of at least five hundred (500) feet to the front.

2. A lamp on the rear exhibiting a red light visible from a distance of five hundred (500) feet to the rear or a red reflector visible from a distance of five hundred (500) feet to the rear.

Sec. 10 A bicycle must be equipped with a brake that will enable the person who operates the bicycle to make the braked wheels skid on dry, level, clean pavement.

Sec. 11 A person who operates a bicycle upon a highway shall observe the regulations and requirements of this article.

Sec. 14 A person who violates this chapter commits a Class C infraction.

**Indiana Paved Trails & Greenways**

The Indiana Department of Natural Resources provides an interactive map of paved trails and greenways in Indiana. The website for the map can be found here: [https://indnr.maps.arcgis.com/apps/webappviewer/index.html?id=332ed3e954974914b26284525ecb1068](https://indnr.maps.arcgis.com/apps/webappviewer/index.html?id=332ed3e954974914b26284525ecb1068) or by scanning the QR code located below. To use the QR code:

**Step 1:** Open the Camera app either from the lock screen or tapping on the icon from your home screen.

**Step 2:** Hold your device steady for 2-3 seconds towards the QR Code you want to scan.

**Step 3:** Click on the notification to open the content of the QR Code.

---

**Hard Surface Bike Trails**

These trails are ideal for road biking, walking, or running. Wheelchairs, strollers, roller skates, and other wheeled vehicles may be suitable on some of these trails.

*Hard surface trails may be asphalt, concrete, brick pavers, crushed stone, boardwalk, or another firm and stable surface.*
Many of these trails are purpose-built mt. bike singletrack, but not all. Most trails are multi-use so please share the trail. Some trail systems may require a permit or pass. Difficulty level ratings of these trails range from novice to expert. Always ride within your limits. Ride dirt trails, NOT mud trails.

Be a leader for cycling in Indiana

Just as Bicycle Indiana is making bicycling better for Hoosiers, the CIBA Foundation is promoting bicycling for all. We're doing this by granting funds to provide free bike helmets for kids, wind in the hair trishaw rides for seniors, support for bicycle infrastructure and more.

Consider a tax-deductible donation to support local cycling projects in Indiana.

Donate at cibafoundation.org.

(You can also mail a check to CIBA Foundation, 711 Kessler Blvd. West Dr., Indianapolis, Indiana 46225.)
